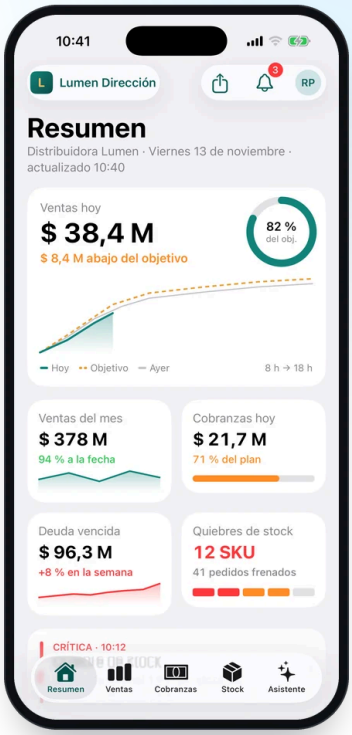
PHOLARSEC EXECUTIVE · APP FOR LEADERSHIP

Know how your business is doing without asking for a report.

Your own iPhone and iPad app, with your company's brand: today's sales, collections and stock, timely alerts and an AI assistant. Private, tailor-made and with no Apple paperwork.



Lumen Dirección for a wholesale distributor

THE PROBLEM

Data built for analysts. The numbers live in the ERP, in spreadsheets or in dashboards you have to open on a computer.

Leadership has to ask. "How are we doing today?" gets answered with an email, a call or a report someone builds by hand.

Deviations show up at month-end. A region that isn't selling or a product running out of stock is found once it has already cost money.

THE SOLUTION

- **Key indicators.** The 4 to 8 numbers leadership checks every day, with detail by period, region or channel.
- **Team alerts by role.** Notify Purchasing, Stock or Collections from the same data point.
- **Widgets and Live Activities.** Today's figures on the lock screen and in the Dynamic Island, without opening the app.
- **Face ID and privacy.** Face ID access, per-user permissions and the app hidden when you leave it.
- **Push alerts.** Threshold alerts that reach the phone when something drifts.
- **AI assistant.** Natural-language questions about the company's data.
- **iPhone and iPad.** A native Apple app, with a region map, Apple Pencil to mark up the dashboard and a daily summary to share.
- **Connects to your systems.** Uses your current API or database. If there is no API, we build it.

WHY PHOLARSEC

An app that is only yours. UX design, code, services and infrastructure built for your company. Nothing is shared with other clients.

Your data and API are yours. What we build on your data stays with your company. It runs on Google Cloud, AWS or your own server.

Private. It's on iOS but not visible to everyone on the App Store: it installs from a private link and only people your company enables can sign in.

Secure by design. Role-based permissions, Face ID access and nothing sensitive stored on the device.

No Apple paperwork. We publish and manage it from our account: no developer account, no D-U-N-S, no certificates.

24/7 support. Every day of the year. Critical incidents answered within 1 hour.

Essential

USD 290 per month

10 users included · extra USD 15/mo
